INDEPENDENT SLATE SUPPLIES

Where quality comes naturally

ISS is proud to offer the Armada Ultra. This slate comes from Southern Spain away from the more traditional slate quarrying areas and falls into our premium range.

The slate is very flat and uniform, making the Armada Ultra an easily workable slate and very practical for any roofer with the opportunity to work with it.

The Armada Ultra is a mid-blue grey slate offering a slight natural texture to its surface, neatly dressed edges and no visual inclusions.

It is available in a 4-5mm thickness making it ideal for Eastern England and London.

As can be seen this premium slate look's great when in situ offering its own unique charm and uniformity, whilst protecting your home for a life time.

Test results

The Armada Ultra slate boasts a W-1, T-1, S-1 rating, meaning it conforms and surpasses all the top UK tests for water absorption, thermal cycle resistance and sulphur dioxide exposure.

If further technical information is required ISS hold the declaration of performance (DOP) for the Armada Ultra which can be provided upon request.

Armada Ultra Sizes Available:

400x250mm

500x250mm

For any questions regarding the technical details, availability or pricing please enquire today through our extensive network of merchant stockists throughout the UK. Depots in England, Wales and Scotland.

Did you know we also stock Fibre Cement slates, Ventilation, Hips & Ridges and Accessories, see website for more...
