INDEPENDENT SLATE SUPPLIES

Where quality comes naturally

ISS is proud to offer the Contessa 39 Natural Slate. This slate comes from Northern Spain, in the heart of the historic slate producing areas.

It is arguably one of the thinnest slates available within the UK market to date. In addition, it is a very flat and uniform slate, which means minimal sorting and grading needed when setting out the roof and finally laying and fixing the slate.

The Contessa 39 is a blue/black slate which can exhibit some visual pyrite, this pyrite is inert and will not effect the performance of the slate as a water tight roof covering.

The slate offers a smooth face with neatly dressed edges.

Test results

The Contessa 39 slate boasts a W-1, T-1, S-1 rating, meaning it conforms to, and surpasses all the top UK tests for water absorption, thermal cycle resistance and sulphur dioxide exposure.

If further technical information is required ISS hold the declaration of performance (DOP) for the Contessa 39 Natural Slate which can be provided upon request.

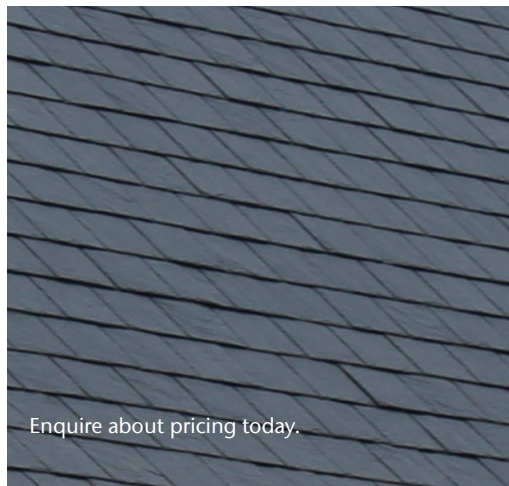

Contessa 39 Sizes Available:

500 x 250mm

For any questions regarding technical details, availability or pricing please enquire today through our extensive network of U.K. merchant stockists.

Did you know we also stock Fibre Cement slates, Ventilation, Hips & Ridges and Accessories, see website for more...
