# INDEPENDENT SLATE SUPPLIES

*Where quality comes naturally*

The ISS-10 is quarried in North Western Spain in the Orense region. This traditional Spanish slate is very hard and durable with a very low water content.

It has a Mid Grey colour, is available in Ultra and Prime grades and boasts a clean flat surface with neatly dressed edges. The ISS-10 comes in a 5mm thickness showing its quality and consistency. This roofing slate is flat and even, meaning there is minimal sorting and grading required resulting in less time and work for tradesmen.

### Availability

Available in wide range of sizes, and is suitable for both New Build and Refurbishment projects.

### Test results

The ISS-10 slate boasts a W-1, T-1, S-1 rating, meaning it conforms and surpasses all the top UK tests for water absorption, thermal cycle resistance and sulphur dioxide exposure. If further technical information is required ISS hold the declaration of performance (DOP) for the ISS-10 which can be provided upon request. The ISS10 conforms to the NF European certification.

## ISS-10

### Sizes Available:

600x300mm

500x300mm

500x250mm

400x250mm

400x200mm
